

Bringing together great ideas
from theory and practice.

Productive and Profitable Farming Systems with Healthy Soils.

Farming Systems Agronomist

Maarten helps farmers improve the profitability of their operations by harnessing the power of natural soil processes, improving their use of inputs & understanding those practices that negatively impact on soil fertility. Australian Story featured Dr Maarten Stapper in 2009 about the change in his career away from CSIRO, reliance on synthetic inputs and GMO solutions. He is now empowering farming families to achieve transition towards biological farming systems.

“Dr Stapper is a dynamic and engaging speaker who is able to relate the concepts of soil health to the practical problems that farmers and gardeners are grappling with.”

Local Producers will also be describing their Local Management Systems towards healthier soils for profitability, and how they got there.

Want to learn more about building healthy soils and how plants and microbes are connected? How does soil biology influence soil structure and chemistry? See and feel soils with roots and plants.

Where: Dandaragan Recreation Centre

Pre-registration is essential for catering
Fee includes 2-day seminar and lunches.

When: Wed 8th & Thu 9th March 2017

Registration 9.00am – 9.30 start
